Welcome to

**MULLIGAN
FENCING**

Welcome to Mulligan Fencing

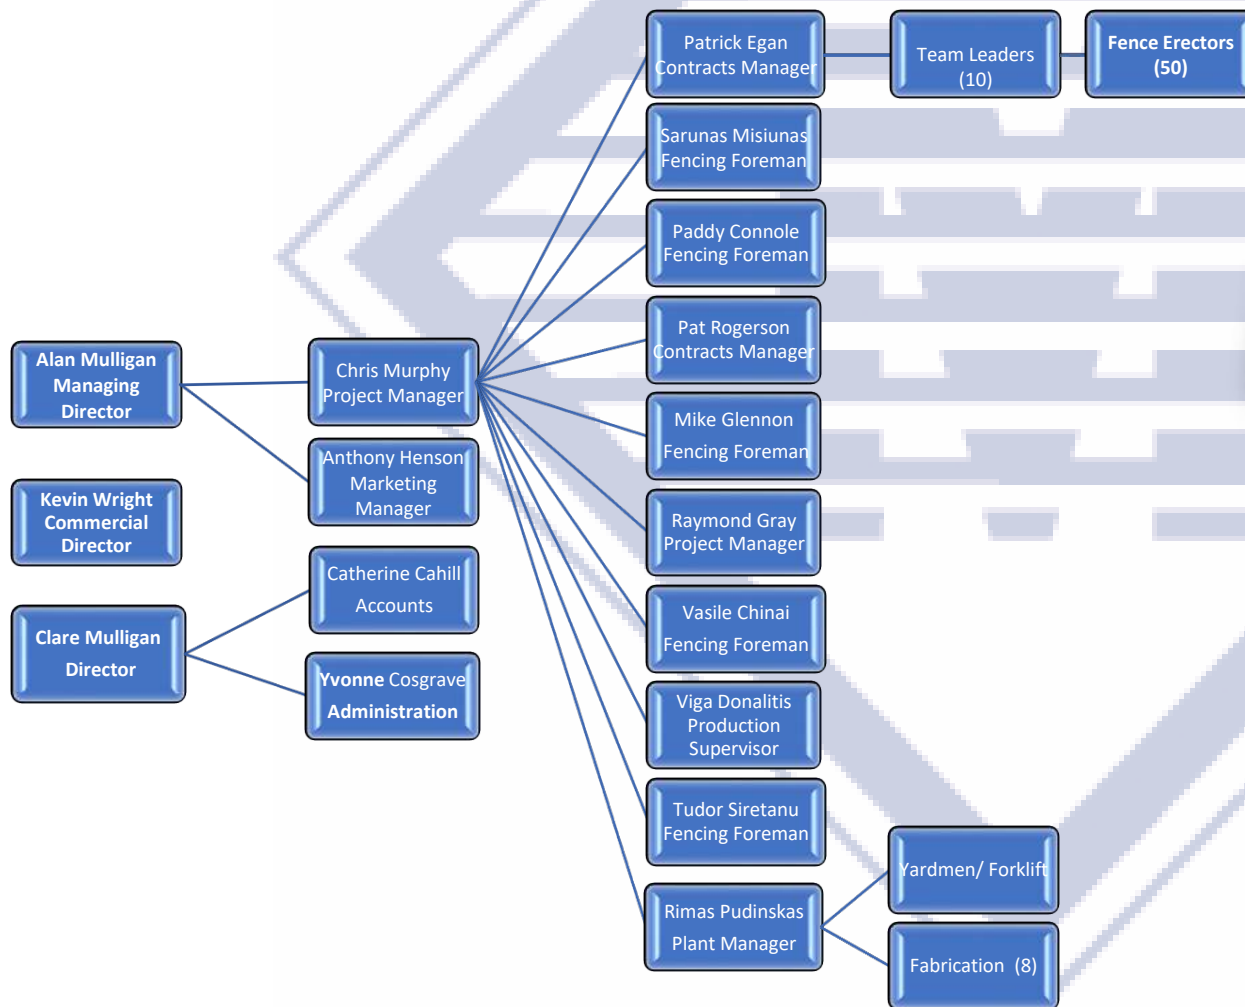

Alan Mulligan began fencing in 1995 and founded Mulligan Fencing in 1998.

We specialise in supplying and installing Roadside Fencing, Environmental Noise Barriers and Perimeter Security Fencing mainly on large construction projects across the UK and Ireland.

We are proud to be ISO 9001:2008 accredited in accordance with National Sector Schemes 2A & 2C.

As all of our installers (over 70 in fact!) are company employees, we can ensure that projects are completed on time and to budget with the skills and resources to manufacture any type of fence specified, including bespoke fencing.

With an excellent credit rating over our 21 year trading history and the ability to self finance, you can be safe in the knowledge that we will deliver to the highest standard of quality work.

Over
70
Direct
Employees

At Mulligan Fencing, we have dedicated fencing crews with impressive output rates such as the ability to complete 25km of Post & Rail in one month.

We have complete control from start to finish, providing our client with one point of contact for their fencing requirements.

N11 Arklow to Rathnew	€1.5m	TPR 45km Security 3.5km	Mammal 27km

Plant Resource

Plant Resource

We feel that it's crucial to own our fleet of plant in order to have the flexibility to meet our customers needs rather than rely on hire companies or sub-contractors. Unlike many of our competitors, we have spent the last 20 years continually investing in our plant department. We have company owned and branded trucks, plant and fencing equipment for every fence type required so you can be assured that we can deliver a fencing project to the agreed timelines and budget.

Due to our own in-house steel fabrication workshops, which are used for the manufacture of posts for noise barriers, security fencing, railings and gates, we have shorter lead times than our competitors.

Here's just a selection of our plant items which is continually growing...

Environmental Noise Barriers

Environmental Noise Barriers

We're proud to be ISO 9001:2008 accredited for the manufacture of environmental noise barriers. Our purpose built manufacturing facility ensures the highest quality noise barrier panels are produced. The consistency and quality of the panels we manufacture ensure efficient on site installation.

But don't take our word for it – all panels are mechanically tested as per IS EN 1794. And if that wasn't enough, the Reflective Barrier is laboratory tested to IS EN 1793 Performance Rating B3 and the Absorptive Barrier is laboratory tested to IS EN 1793 Performance Rating A4.

So you can always trust that noise will be kept to a minimum!

Motorway Post & Rail

Roadside, Motorway & Highway

Post & Rail

Typically erected along roads, motorways and highways, Timber Post and Rail fences are extremely popular and provide an elegant visual finish.

Mulligan Fencing have dedicated motorway fencing crews with very impressive output rates. We cover all types of motorway fencing from both HCD & RCD series.

Our mammal proof fencing ensures that specific requirements can be catered for, including preventing badgers digging underneath the fence. With our rubber tracked post driving units, we have the ability to cope with very difficult ground conditions, which are naturally common in the UK and Ireland!

Motorway Strained Wire

Roadside, Motorway & Highway

Strained Wire Fencing

Our Strained Wire fence is suitable for roadways and also low risk properties, and provides economical protection and security for commercial or industrial properties.

We offer bespoke solutions to your specific requirement and with extremely quick turnaround times.

Extensive range of heights available and all applications can be adapted with extensions for barbed wire and all mammal mitigation requirements to enhance the security offered.

With our excellent range of plant machinery, we have the ability to complete the job regardless of the terrain.
